PensionPal Member Websites

From 1 October 2020, trustees of defined benefit pension schemes are required to publish their Statement of Investment Principles (SIP) on a publicly available, free to access, website for members.

We have launched two cost effective, quick and easy to implement "Member Website" solutions for this purpose.

If you have not yet decided how to proceed, we can offer you a solution that will meet your needs.

Who is this aimed at?

Trustees and sponsoring employers who:

• Simply want to meet their "on-line compliance" requirements
• Wish to provide broader on-line engagement with employees and pension scheme members
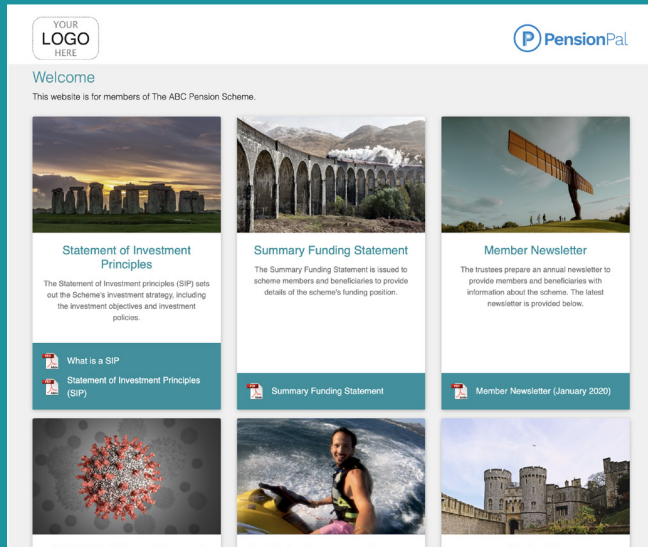

Why PensionPal?

PensionPal Ltd is an established provider of online software solutions for trustees and sponsors of UK pension schemes.

We were established in 2006 and are extremely proud of our strong client list consisting of pension trustee boards, firms of pension professionals and independent trustees.

We have a strong track record of delivering innovative, scalable and easy to use IT solutions for the pensions industry.
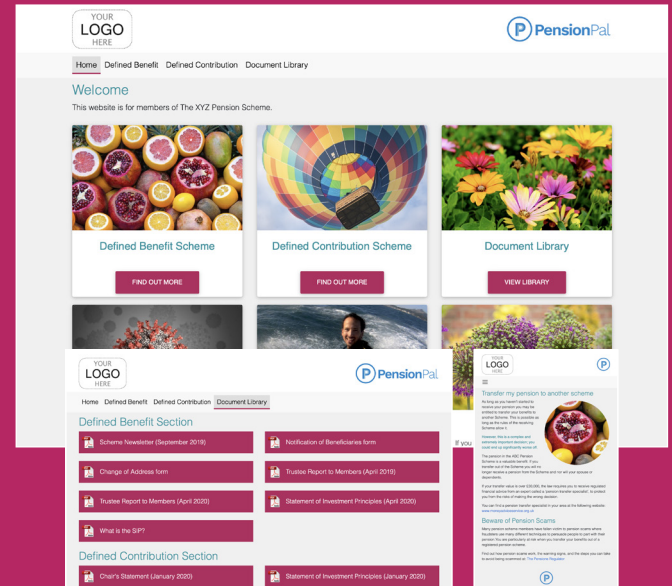

PensionPal

To help trustees we have launched two online solutions:

Solution 1 - A single page "compliance" site

This will allow you to share important documents, links to external sites and key messages with members.

Solution 2 - A multi-page site tailored to your needs

This is ideal for trustees and employers wishing to embrace online communication for their benefit arrangements.

It provides tremendous flexibility allowing you to share a wide variety of content with scheme members in a logical and structured way.
